CIA HISTORICAL REVIEW PROGRAM
RELEASE AS SANITIZED

2003

A SUGGESTED PLAN FOR PSYCHOLOGICAL WARFARE OPERATIONS
IN CONNECTION WITH OVER-ALL GUATEMALAN OPERATIONS

PHASE I:

1. [ ] will immediately report on Mexico-Guatemala covert transport facilities for PW materials including data on possible expansion and effectiveness of this mechanism.

2. Station Guatemala will be ordered to procure pix re poverty, discontent, etc within one week.

3. Guatemalan COOKIES will be prepared. Some COOKIES will be surcharged with Communist symbols, pix and names for ostensible use as Communist revolutionary COOKIES.

4. An immediate investigation of radio facilities inside and surrounding Guatemala will be made.

5. RUFUS will be ordered to check and consolidate his control over radio, telephonic and military communications facilities. (divisions within army officer clique)

6. Propaganda materials designed to excite discontentment throughout Guatemala will be prepared and distributed. It will be aimed at low level targets, enlisted men and officers and special groups such as lawyers, students, etc. (Subjects will concern cost-of-living, Article 32, tortures, injustice and Communist influence among other subject material.)

7. Rumors and other propaganda materials will publicize any real or feasible possible threats to Guatemala which would tend incite disloyalty to the ARBENZ regime.

8. Letters will be prepared by a group of Guatemalans in Mexico and mailed day-after-day to a selected list of military leaders in Guatemala. These letters will explain why materials are not forthcoming to the Guatemalan army --- putting the blame on the shoulders of the Communists in the Guatemalan government. Only solution offered will be deposing of Communist influence.

9. A high level agent of RUFUS, in the Guatemalan Military, will begin "buttering-up" officers belonging to "Promocion 24" in order that they will later accept an invitation to his home on the night of D Day - 1. (Rejected by SEEKFORD as unneccesary)

10. A letter will be mailed from Central America on a periodic basis to Guatemalan army leaders telling them that they are not trusted and citing the fact that arms are being supplied by the Guatemalan government to Communist political and labor leaders throughout Guatemala. Similar letters will be mailed from within Guatemala from towns where said arms are cached.

11. The spreading of rumors within the Guatemalan army will be continued throughout all phases. Several themes are suggested below, but will have to be played "by ear" on-the-spot at appropriate times:

For Officers:

A. Rumors about assignment of particular officers to worse posts;
B. Soviet officers are going to be sent over to check on ideological proficiency of Guatemalan officers;
C. Discussions are being carried on by Arbenz and the Communists as to how military funds can be transferred to the development of a militant Guatemalan Communist Party;
D. Certain officers are going to be liquidated;
E. Arbenz is planning, with the aid of FORTUNY, to establish a school for a Guatemalan NKVD. The graduates will be given high army rank and placed in charge of units.
F. Several army officers in the interior, have already agreed to join insurgent forces. The officers named will be those known as loyal to ARBENZ.

For Enlisted Men:

A. A cut in military appropriations in anticipated. Only enlisted men will be affected since officers have to maintain certain standards.
B. Any inconvenience or bad morale factor should promptly be turned toward the Communists and officers playing ball with the Communists.
C. The Communists are going to force all Catholic troops to leave the Church and join one which worships the memory of STALIN. Appeal to the Archbishop and tell your wives to get up a petition protesting atheist Communist policies.
D. Such and such a unit,(known to have a good "deal") is going to be sent to some undesireable post.
E. It is interesting to note that the sons of Communist politicians never serve in the Guatemalan army. They are too busy going to the USSR and swearing allegiance to it rather than Guatemala.
F. Joe Blow died of food poisoning last week, another died of typhoid --- better not drink or eat much until this situation is investigated.

12. "Black" posters and handbills will be prepared in Headquarters and distributed within Guatemala which indicate that FORTUNY is intent on taking over activities of GUTTIERREZ and vice versa --- in contradiction to their agreement.

PHASE II:

1. Rumors among officers and enlisted men in the Guatemalan army will be continued and intensified;

2. Discontent propaganda will be stepped up where-ever thought most appropriate, but special attention will be given to Guatemala City and other cities where military installations are located.

3. A phoney "Communist splinter group" will be created through production of a letterhead. Its contents will be prepared to try to create division among the Communists, and will be created by the Station, mimeographed within the Station and mailed in Guatemala City.

4. Propaganda re threats of outside action will be continued through rumor and through Mexican PW outlets.

5. "Black" handbills will be printed stating that the USSR, to reward its prime Communist example in the Western Hemisphere, is going to send - gratis - machinery, clothing and food to Guatemala. This will, of course, be timed so that no supplies could possibly be forthcoming and will be followed up with "grey" handbills pointing out the stupidity of the Communists for trusting the USSR, calling for the ridding of Communist influence in Guatemala.

6. A letter from a Communist European front will ostensibly be mailed to FORTUNY, telling him that GUTIERREZ has been reporting to Moscow about the activities of FORTUNY and that unless GUTIERREZ can be silenced, FORTUNY may be purged.

7. Tickets for an "outing", scheduled for D-Day can be printed up for release the night before D-Day. Enough free things can be promised so that many will come. People will have to travel toward military installations to reach the outing site --- thus creating a movement of innocents toward military installations, blocking road arteries and making false diversion of troops possible.

8. Invitations to members of "Proocion 24" to a large party in honor of a high army officer will be issued for the night of D Day -1 by a RUFUS officer.

9. Letters from Mexico, Central America and from within Guatemala will continue to be sent to army officers.

10. Envelopes containing a letter, coupon and a substancial amount of COOKIES will be sent to as many enlisted men as possible. The letter will ask enlisted men to sign the coupon, swearing allegiance to the USSR and the Guatemalan Communist Party and send the coupon to Communist Party Headquarters. COOKIES will be crude enough that they will be revealed for their true worth immediately upon trying to use them thus quickly creating a unhappy reaction toward the ostensible donors.

11. Radio broadcasts will be stepped up in countries surrounding Guatemala.

12. A "Communist cell" will be uncovered in Salvador which will contain: Pland for overthrow Guatemalan miltary; Plans for subversion of Central American governments; Plans for overthrowing the Guatemalan government; Photo posters of FORTUNY or whoever is picked as the ostensible "new President"; Soviet medals and commendations for new People's Republic of Guatemalan leaders and COOKIES surcharged with Communist symbols, names, etc.

13. The "plot" will be propagandized throughout the Western Hemisphere, be called attention to the UN and OAS which will also be publicized throughout Guatemala and the Western Hemisphere.

PHASE III:

1. "Black" propaganda will proclaim the innocence of FORTUNY and put all the blame of GUTIRREZ. for the "Communist Cell". Black GUTIERREZ propaganda, if needed, will call for a vote of "no-confidence" in FORTUNY.

2. Rumors within the armed forces will be increased.

3. Aforementioned letters to leaders of the armed forces will continue to be mailed --- now varied to include quotes from the Communist cell material and guesses as to who would be liquidated if the Communists took over.

4. Communist "splinter group" mimeographed letters will be sent to non-Communist and Communist leaders pointing out all disaggreements of USSR backed Commie and call for formation of a nationalist Communist Party resembleing a communalism party set-up such as was had in pre-Spanish conquest days.

5. Through "official mail" COOKIES will be sent to labor leaders, army officers and others as a gratuity for their future support.

6. The 30 Day Plan will be instituted, with certain changes re only 20 days and concentration on Guatemala City and several other key targets.

7. It is assumed that RUFUS will have armed men in Guatemala City; RUFUS officers will have been assigned specific tasks; and all Communications, water and electric facilities will be under RUFUS control.

8. RUFUS troops will put mines in tank treads and smoke-fire bombs in air craft and as many vehicles as possible. (D-Day)

9. D-Day -1, "Promocion 24" Officers will go to party and as they leave they will be abducted. Then an attempt will be made to assure their active cooperation for D-Day. If they agree, men will be assigned to insure that they do so. They will issue orders designed to confuse, dismay or force surrender of government troops.

10. The night of D - 1, the telephone wires of Communist leaders will be severed at about mid-night or after Communists have retired.

11. By dawn of D-Day, roads to military installations should be packed with people going to the "outing". Among the innocents will be [redacted] RUFUS agitators men who in the event of trouble will [redacted] keep people moving toward bases [redacted] causing a diversion of miltary strength from where it should be.

12. The RUFUS radio stations will broadcast that the coup has already taken place and announce a new democratic government with no Communist leanings. Communist horrors can be reviewed and again denounced. Government leaders part in International Communist plot will be reviewed and comments of the free world told about.

13. Telephone communications will be restored to cities where military installations are located. Commanders will be told that Guatemala has capitulated, and that other outposts have too. Lines between one outpost and another will have been cut to prevent inter-post communication and to assure a feeling of isolation.

14. Amid announcements of a new program RUFUS should make a strong show of strength to assure the populace of his ability to in fact continue to cammand an anti-Communist government. Water power and electricity will be restored and some extremely generous gesture should be made to the poor and to the army.

15. The Arch-Bishop may be induced into making a Church holiday and call for special masses to give thanks to God for the defeat of atheist Communism in Guatemala.

II. OBJECTIVES

1. The propaganda campaign is oriented to :
   a. combat International Communism in Latin America
   b. combat the communist government of Guatemala until it is overthrown.

Point (a) contains, as specific problems:
1. The struggle against communism, which has infiltrated the countries of Central America and the Caribbean area, until its complete and definite eradication is achieved;
2. To induce the people of the before-mentioned countries to struggle against communism within their territory and to encourage their governments to take open, strong and decisive action; and
3. To convince the people and the governments of the before-mentioned countries of the grave dangers that for them and for the rest of the continent is represented by the existence of a communist government in Guatemala, which operates, as a general headquarters for the Soviet, in open actions of infiltration, organization and subversion. All lines of Point (b) should converge on the overthrow of the actual government, to be substituted by a democratic regime.

2. To achieve such objectives the campaign will attempt, fundamentally: to convice the people of Latin America of what communism is and what it signifies: its philosophy and its reality, explaining the situation - in the political, economic and social order - of the countries that have fallen under the Moscovite orbit; communist expansion in the world and its plans for domination, its tactics of struggle, penetration and control of the laboring class; the demolishing action of Marxism in the religion, morals, culture and in the education, in the family, citizenship, etc.; communist atheism

and Christianity, two philosophies at war; the slavery of man within a totalitarian system such as communism and the freedom found in a democracy; the great frauds of Communism: the history of the Communist Party, how it came into power, its authority, imperialism in action, the fraud of the peace campaign; what awaits the american people if the communists come to dominate the Continent, etc. The other themes directed toward convincing the great masses of the grave dangers that threaten them, of the situation of the people controlled by Marxists and of the fraud of communism in action will be developed.

3. The critique mentioned in the preceding point should be completed with lines of constructive propaganda, whose themes among, others, should comprise: the humanization of the capitalist economic system; the alleviation of the misery and poverty in which the majority live; the elevation of the worker's standard of living, and the plans to lower the cost of living; the protection of the workers through social security - properly organized; the Agrarian Reform directed to create new property owners: the land, the technical education of the farmer and rural credit; production and consumption cooperatives (educational campaign); integral cooperative systems opposing organized international communism, etc. Also, the campaign should be oriented to create an atmosphere to encourage the holding of congresses, and international meetings, which will have as a purpose the study and resolution of the economic and social problems of the nations that make up the continent. In brief, the defense of humanized capital, under the rational plans of effective improvement or betterment for the dispossessed classes.

4. The Guatemalan campaign is specifically in accord with what is stated in Paragraph 1 of this chapter and the themes that are expressed in this memorandum.

o. Present a weekly report to RUFUS on all the jobs done during the week, attaching eight examples of each propaganda material printed.

p. All other functions, tasks or activities, necessary for the best results of the propaganda campaign in the interior of the Republic of Guatemala.

The Committee will be in contact with the directors of the entities mentioned in Point 4, immediately preceding, so that each one of these organizations, with all their regional committees, and affiliates, will cooperate in an active and effective way in the work of great responsibility which has been assigned to this Committee.

The Committee of Guatemala should secure the places in which it is going to deposit the propaganda and the secret transportation of this material to the various places of distribution and make the estimates in order to determine the quantity of printed propaganda which may be needed for each region of the country.

The Committee should remember that the espionage services of the government and of the political parties will try to discover the deposits and the persons who are directing the internal movement, and this will make it necessary to take all security measures imaginable so that the plan will be developed in accord with our programs.

The Committees will consider how the campaign of the interior may be improved, making suggestions which it considers convenient and within the special powers conceded to it by RUFUS; to act immediately, taking advantage of the opportunities of the moment; and in case the communications with the Central Committee are cut, it may act within the directives contained in the GENERAL PLAN until such communications are re-established.

6. EL SALVADOR COMMITTEE

In the city of San Salvador, capital of the Republic of El Salvador, a committee of propaganda, will be organized and will function with jurisdiction El Salvador, and will be in charge of the development of the specific plans for this country and its work will be realized with the cooperation of the Guatemalan emigrants and the organs or public officials which have offerred their cooperation.

7. The groups of exiled Guatemalans who collaborate with RUFUS will be organized as an anticommunist entity, seemingly unrelated to the organizations in Honduras. On establishing this entity, its foundation will be made public issuing a patriotic manifesto which will be published in the Salvadoran press and in handbills and reproduced by the press of Honduras and Guatemala. To this last mentioned country, a sufficient number of samples will be sent in order that it may be known in the different departments of the Republic. This will be accomplished before the 30th of November of the current year. The manifesto should be of exalted patriotism and will determine the anticommunist stand of the organization and its aim to struggle against international communism; its first stage being the salvation of Guatemala and the organization, in this country, of an integral demoracy which will guarantee the interests of the majority while it recognizes and protects industry and private property. It will abstain from attacking the persons or conduct of other guatemalan exiles, and will encourage the people not to be discouraged in their struggle against communism.

This organization will select the persons which should comprise the propaganda committee referred to in point 6.

8, The Committee of El Salvador will depend on the Central Committee presided by RUFUS, in accord with what is expressed in points 1 and 2 of this chapter. It will request the aid of the Salvadoran government in the anticommunist campaign in the country and will prepare its work in accord with the portion of the plan specifically corresponding to their section and to the instructions that it may receive from RUFUS. Among other functions, it will be in charge of the following:

a. Directing, orienting and controlling the campaign which, in accord with the GENERAL PLAN, corresponds to this country;

b. Entering into immédiate relation with the Salvadoran anticommunist organizations, in order to obtain the aid of these for the propaganda campaign which concerns it;

c. It will assure the publication of original and reproduced articles, which are suitable, in two of the principle newspapers of El Salvador.

d. Assuring effective collaboration of the Salvadoran anticommunist press in a campaign of progressive development, in which the writers of the country may focus the salvadoran communist problems, ~~the~~ marxist infiltration, with the aid of the government of Guatemala and the subversive results of communist action to take possession of the government;

e. Being responsible for the printing, recording and reproducing of propaganda, using the machines which will be sent to it by the Central Committee and be responsible for the guarding, maintaining and operation of such machines;

f. Preparing the programs corresponding to the development of each of the STAGES that comprise the PLAN, in accord with instructions it receives. It will also make suggestions, observations and recommendations which it deems pertinent;

g. Development and intensification of the program "Canesa" within the plans that had been conceived.

h. Organizing and controlling the station "Ubeda" to serve our cause, checking its transmission and reception especially in Guatemala. The studies should be under the control of the Committee, which will review the programs corresponding to the radio campaign and will contract the services of the personnel that are indispensable for the special propaganda tasks. In accord with the original ideas, the station will have a commercial character and should see that its programs awaken an interest in the radio listeners, so that its transmissions will be known and heard when the propaganda campaign is initiated.

i. Producing smaller printed propaganda, recording of original themes and the introduction of this kind of propaganda into Guatemala.

j. Preparing a financial study for periods of 30 days, beginning the 1st of December of the current year, that may comprise all the expenses corresponding to their section.

k. Rendering a report every eight days to RUFUS on the work developed during that time, attaching eight examples of each propaganda material printed.

l. The Committee will be integrated by people of absolute confidence who will unfold their activites without ostentation and will conceal as far as possible, their dependence on the Central Committee presided by RUFUS.

The Committee should gather or organize the necesaary matérialt for the introduction of propaganda into Guatemala, not only of that which is prepared in El Salvador, but also what is sent from Honduras.

There exists justified interest among the government circles and capital of El Salvador in regard to anwell oriented and well directed campaign against international communism and its penetrattion in the country; taking into account these reasons, the Committee should try to obtain the decision of the government and dapital to initiate a strong campaign in their territory with projections into Guatemala, and in this case, coordinate their work.

9. MEXICO COMMITTEE

The activities in this republic should be viewed as two separate operationn:

a. Those that are performed by an anticommunist committee made up of Mexicans;

b. Those that are assigned to committee whose tasks are to form consciousness against communism in Latin America and to prepare the proper atmosphere for the movement for the salvation of Guatemala.

The first of these entities should be made up of anticommunist Mexicans, as in many casss it would have to aim at the problems of socio-political nature of their country. The fundamental objective of an organization of this nature, will be to paralyze any action that the mexican communists would want to realize at H Hour on D Day. Another objective of this organization will be to reply to any public attack that mexican individuals or organizations may launch against our campaign. These being the fundamental objectives, this organization would have to have the support of the mexican anticommunist organizations and, especially, the National Confederation of Students.

The second organization should be made up of Guatemalan exiles, coordinating their work with that being developed at the time, by the "Committee of Liberation of Guatemala", if this can be achieved; but, if this is not possible, it will act independently coordinating their tasks with the GENERAL PLAN, in harmony with that which is expressed in Points 1 and 2 of this chapter.

The Mexican Anticommunist Committee can begin its formation, making use of the work of the Guatemalan university students in exile, for which the necessary contacts would be made and then decide on its organization and activities. It is possible that it may have the Mexican University Confederation, directed by anticommunist elements, act as such an organization, which would give us a solid backing for the work mentioned before. The measure will be oriented to form this entity and for the exclusive ends to be presented.

In regard to the Committee of Emigrants of Exiles, already in collaboration with the "Committee for the Liberation of Guatemala", it would be in charge of the activities, generally, in the Latin American campaign. It would coordinate with the anticommunist organizations that are now functioning in the Hemisphere, and also would be in charge of all particulars related to the propaganda campaign against communist penetration in Guatemala, its development and its dangers. In addition, it would be in charge of the preparation and manufacture of propaganda to be distributed outside of Mexico.

The work of these committees would be directed to:

a. Continue the campaign in Latin America, studying the one that has been carried on, in order to check its effects within the objectives desired.

b. Improve the plans and possibilities for executing them within the standing budget.

c. From the mexican nationalism angle, outline the themes of the campaign against communism in the nation (action of the Mexican Committee).

d. After the plans are reviewed, and the resources are determined, to work intensively in the selected countries according to the objectives stated in the second chapter of this memorandum, controlling the campaign and adapting it to a clearly defined and progressive program.

e. The preparation and printing of propaganda material in accord with the specific line for this country; a

e. newspaper and radio campaign focusing the diverse events occuring in Guatemala, derived from communist control that enjoys the protection of the govemment and from acts related to international communism.

f. To demonstrate great activity, as a distraction or diversion movement for the government of Guatemala, obscuring the activities that develop in the Republic of Honduras.

Complying with these ideas, the work of organizing these committees should be initiated at the end of the present month, for it is not considered absolutely necessary that the campaign in the Republic of Mexico be initiated on the 1st day of December of the present year. The action can be initiated at the end of PHASE A of STAGE I, that is to say, on the 16th of the month of December.

IV. SECRET COMMITTEE OF NICARAGUA - BELICE

1. In this Republic, an anticommunist committee will be organized secretly. It will be composed of the persons that RUFUS selects. Because of obvious reasons, their work will be, as has been said, secret. The attention of the government of Guatemala nor that of communist organizations should be attracted, on the contrary, it should lend confidence that all the activities are concentrated in Honduras, El Salvador, and Mexico.

There will be no public nor open work done. Not even the organization of the committee should be known and its propaganda activities should be limited to the clandestine distribution of material received from the Central Committee and to the requests made by RUFUS through a special representative for certain reproductions of certain articles that may be published in the press where the other committee function.

RUFUS, through a special representative, will explain the situation wherever necessary; therefore, it will be well protected and its activities will be justified.

2. No type of propaganda will be introduced in the territory of BELICE, except, if something contrary to this is decided later. No committee will be organized nor will any other activity be carried out, except, through instructions that may later be received.

V. ACTION

1. By the first day of December 1953, all, absolutely all, should be ready to be put into effect (the propaganda campaign). Therefore, by this date, the general plan and the possibilities for realizing

it, should be studied and approved, after which it may be executed, following the directives which will be determined. The program is flexible - can be easily adapted to the military plan.

2. Complying with the instructions sent by RUFUS and the preparations that are under way, by the 1st day of December, the committees of Honduras, Guatemala, El Salvador, and Nicaragua will be organized. The committees of Mexico will be in the process of formation and the study of the specific activities that correspond to them.

3. The Central Committee will have distributed the printing, tape recording, and reproduction machines, to which this memorandum referred, among the Committees of Guatemala, El Salvador and will send the printed propaganda material to Guatemala. The material is ready for distribution, in accord with the plans which are expressed in this memorandum.

4. The Committee of Guatemala and the Committee of El Salvador will have unfolded all the activities corresponding to their internal organization in accord with that which is stated in Points 4 and 5 of Chapter III, for Guatemala and Points 6,7, and 8 in the same Chapter for El Salvador.

5. The Central Committe and the Committees of Guatemala and El Salvador will find themselves - on the date already indicated - (1st of December) - with the possibility of initiating all the tasks assigned to them, and therefore, will have made all ~~the~~ preparations so that action can be started and can be developed according to the plans expressed in this memorandum. RUFUS, through the Central Committee, will send all the instructions for the direction, orientation and control of the program and will have organized the Committee that presides.

6. With the bases or foundation determined, PLAN 19 will be started, on the 1st day of December of the present year, but if for some reason, the preparations to which reference is made, have not been completed, the PLAN will be initiated on the 10th of the same month, deducting those 10 days from PHASE A of STAGE I.

7. Before initiating PLAN 19, the Committee of El Salvador will complete ~~in the best manner~~, Point 7 of Chapter III, which refers to its organization and to the public declaration that shouls be made. RUFUS should consider the convenience of sending the equipment and machines for work and the printed propaganda which is already prepared, to Guatemala, before issuing the manifesto. In the same way, he should check that the communications with this republic are secure for future shipments of material and for all that is related to its direction, orientation and control.

VI. ACTION: DIRECTIVES

1. The fundamental objectives of the propaganda campaign will be oriented:

to combat international communism in Latin America and to combat the communist government of Guatemala until it is overthrown.

Taking such proposals as a basis, the Central Committee, with its seat in the city of Tegucigalpa, Honduras, will send selected propaganda to the university centers and catholic organizations, the accredited diplomatic missions, student organizations and urban and rural labor organizations, and anticommunist centers and newspaper and radio establishments, state organizations and the high officials of different countries of America. This material will be published by the different committees in these countries. (Newspapers, newspaper clippings, stamps, cartoons, etc.) In this way, when the campaign against Marxist penetration in the continent gets under way, a favorable atmosphere for the liberation movement of Guatemala will be created in the nations that compose it.

2. The action against communism and the government of Guatemala corresponds, as was said before, to all the anticommunist organizations of the mentioned countries, directed by the committees referred to.

3. The Mexican Committee, in charge of the program for Latin America, will complete the work referred to in the first paragraph, developing the program specifically related to this activity.

4. The campaign embraces two aspects: the powerful struggle against communism in the international order and the internal order of each nation, and the powerful continental constructive action for the benefit of all the american countries. As to the specific action on Guatemala, this too will include the two directives: a powerful struggle against Communism and within it the determination of an ideology and a realistic program of national reconstruction. This program will mark or outline the lines of immediate execution that the salvation movement proposes.

VII. ACTION: PROGRESSIVE DEVELOPMENT

1. The execution of the propaganda campaign for the countries of Latin America will be realized following the plan proposed in Points 1,2, and 4 of Chapter VI immediately preceding, which will be completed with the programs of work assigned to the committees that are going to operate in the Republic of Mexico.

2. The Guatemala campaign will be adapted to the stages and phases

2. of operation stated in Chapter I of this memorandum and in them, the symbols adopted by the committee of Anticommunist University Students, will stand out, followed by the serious, forceful and destructive accusation against the revolutionary governments of Arevalo and Arbenz and against international communism that has prompted and directed them, an accusation which will be made before the people of Guatemala and before the rest of the world. For this reason, the propaganda campaign will begin with the profuse distribution of pamphlets that will contain these symbols, and an explanation of what such symbols represent in the struggle against communism, making from them the flag for the movement of "national salvation", under which should united the Christian people of the Republic, all the men and women who want to fight for the liberation of their country, and with it, their homes, patrimony and freedoms; and all those who want to maintain democratic institutions in their country, among which is found the defense of the law, the basis of all political and social organization. The symbols of GOD, COUNTRY, AND LAW AND ORDER (DIOS, PATRIA, DERECHO) should be completed with the symbols of JUSTICE, TRUTH, AND WORK. Justice, in its individual concept and in its great social concept; Truth, as an emblem of sincerity, good faith, in the realization of its high ideals, and as the antithesis of falsehood, the constitutes the standard of the communists; and Labor or Work, as a noble attribute of the human being, as a fruitful expression of the creative spirit of man, as an honor in life, as heroism, imparciality, and self-denial; and not, as exploitation of man by man or the exploitation of man by the State, as subjugation and servitude, as communism views it.

3. STAGE I is oriented to create awareness in all the sectors of the country, lifting the flag around which they should unite. For this reason, a complete understanding of the symbols should be brought to all the sectors of the country and what each represents opposing marxist action. Once this consciousness is formed, the attack against communism, which denies and destroys what each symbol represents, will come.

STAGE II intensifies the attack against communism and against a communist government, pointing out its destructive action in the moral, social and economic orders and will focus the forceful criticism on all the acts of the public administration - on the misery it has brought to the country; misery of which the working class has received the strongest impact, the crimes committed, the vandalism and the administrative pillage, the fraud, the robbery, the corruptive action, the anarquy, the dictatorship, the tyranny and the despotism, the ridicule of the masses, the squandering of State funds, the neglect of public health and social security, et etc. All the defects should be uncovered, naming those reponsible.

STAGE III will be oriented to urge the people to take action against all those repponsible for the state in which Guatemala finds itself, so that they will take up arms to overthrow the government, punish the guilty, and eradicate - completely and definitely - communism - lending trust, faith and security to the masses, of the high ideals and generous proposals that incite the men who direct and carry out the revolutionary movement. The people should be

inspired with great patriotic fervor and with a great fighting spirit.

When the desired ends are achieved the campaign will have realized the conceived plans, ~~and at that time~~ the action will be suddenly cut, to leave the government and the communists disconcerted. At that moment, PLAN 20 will begin.

All the preparations for military action should be completed when STAGE III begins, so that we can act immediately, at any moment in which the people, incited by patriotic fervor, launch into battle.

Examples: letters sent to the Army chief of headquarters in the Capital informing him that he is going to be transferred to the base in Coban. A newspaper flier - small - will be published in a clandestine manner, inciting the people to drive the communists from all public positions and inciting the Army to unite with the masses that repudiate Communism in order to save Guatemala from a bloody, disastrous civil war. It will show or picture Arbenza as the head of communism in the nation and as the one responsible for all the grave ills of the Repbulic. It will accuse all communists of being traitors to their country as they are giving Guatemala overtto Soviet domination, and that the people should rise to punish those who have sold the Country to a foreign government.

The Committee of Anticommunist Workers, the Committee of Market Women and the Committee of Post Primary Students of Guatemala, will

On its morning, afternoon and night programs it will broadcast the articles prepared; the articles of greatest importance from the Catholic newspapers, CEUA and the independent press, as well as from CEUAGE, the press of Honduras, El Salvador and Mexico; and one of the selected prayers; closing the program with the same sentence: "God save Guatemala. GOD, COUNTRY and LAW AND ORDER". (It has three programs daily - one hour each).

The Mexican press will take the same position, focusing the problems of Soviet imperialism on the American continent.

CEUAGE, Honduran newspaper, will publish the manifesto of the PUA, the Market Women, the Catholic workers, and Post Primary Students, and will comment on the latest events in Guatemala. It's accusations will become stronger. It will give information on the development of the crusade against Communism. In the presentation of their ideological program, it will focus "The Institution of the Army", developing the ideas contained in the

political memorandum in RUFUS's possession.

The Canesa programs will continue intensifying the themes designated for the press of Honduras and El Salvador - aimed against communism and the government of Guatemala.

The Committee of El Salvador will issue its manifesto to the people of Guatemala encouraging them in their struggle against communism and the government, and under the symbols: GOD, COUNTRY, and LIBERTY, it will unite in the crusade for the re-establishment of democratic institutions in the country. This manifesto will be printed to be circulated more profusely and distributed or broadcasted by the Station Ubeda.

The radio station of the Central Committee, operating clandestinely, will continue its action against the government of Guatemala and the communism enthroned there. The Station Ubeda, of El Salvador will chagge its frequency in order to operate secretly, following the same directives for the radio station of the Central Committee. These two stations will operate as if they were installed in the territory of Guatemala (clandestinely) and their action will be intense and repeated , like the pounding of a hammer. Examples: PROGRAM A. "Catholic people of Guatemala: Communism denies the existence of God and tries to destroy our religious sentiment that makes us spiritually strong. Let us fight against Communism". - "Fellow citizens: Communism is destroyingoour ideal of citizenship, giving our nation over to the control of a foreign nation. Let us fight against Communism." - "Urban and Farm Workers: Communism has infiltrated your sindical organizations, imposing the dictatorship and tyranny of their leaders". Let us fight against Communism". "Citizens: Communism has brought misery to the suffering people of Guatemala, has created legions of unemployed that are suffering from the Horrors of hunger, and, are now raising the cost of living to foment despair in your homes. Let us fight against Communism".

Let us fight against Communism". "Army of Guatemala: your leaders find themselves in the service of international communism and have given the nation over to a foreign government. Fight against communism". -

"Army of Guatemala: Communism has not succeeded in corrupting the officials and soldiers and in their defeat is training Popular Militias to fight against you. Fight against Communism".- "Army of Guatemala: the country entrusted you with the defense of its institutions and gave you the duty to maintain them; Communism functions in the territory with the support of the Commander in Chief of your Institution against the mandates of the Fundamental Charter of the Country. Fight against the Government." - "Fellow Citizens: The government squanders the people's funds on fairs, orgies, and in the sending of Communist delegations to China, Vienna, Budapest and Moscow, on fomenting Communism in the brother countries of Central America and on the insaciable enrichment of the high officials and publis employees, on the leaders with unconditional control in the communist party, on the leaders of the revolutionary parties and on the leaders of the Legion of the Caribbean , while in our hospitals, your wives, your children, your fathers, your brothers lack even the cheapest medicine because of lack of funds to buy them".

Each one of the programs has a certain purpose and the prime one is to impulse the people to overthrow the government and eradicate Communism completely and definitely in Guatemala. In the same manner, there will be special programs showing the disintegration within the ranks of the Army, government, and political parties, showing that the hour for the liberation has come, that the least responsible ones can still be saved if they unite in the struggle to overthrow the actual regime, and that the Army, free from responsibility, that repudiates communism, should unite with the pepple to launch into battle. It will be repeated on such programs that the majority of the Army is with the people and not with the traitors that unlawfully hold the power.

Also, in these programs, it will be made known that the Guatemalan communists and foreignors are preparing to flee into the legations and embassies, abandoning those who up to today have followed them and that the people should prevent their fleeing. The psychological impact of these programs has to be great and to achieve this, the themes should be well chosen and hammered into the minds of the persons for whom the campaign is directed.

The two clandestine radio stations of Honduras and El Salvador operate from 5 in the morning until 12 at night, daily. In regard to the programs referred to they will include: The broadcasting of the tape recordings and records with the "Voice from the Grave" (Arana). This programs is opened with 12 bell tollings, or with repeated echos of bells tollings and then Coronel Arana will speak "It is ---- o'clock, the end of Arbenz's government and his betrayal of Guatemala, approaches. Let the traitors tremble, let the assassinators of the people tremble, let those who sacrificied me because I opposed their nefarious designs, tremble". - The echoes and the voice from the grave is repeated and read to the people, the army, the government and the assassinators. These programs should be carefully prepared so that they will produce the psychological effects desired. In these programs, there will be a clandestine broadcasting Station working in coordinated action with the rest. (I_{η} Guatemala). Patriotic songs, brief proclamations, prayers, and attacks as well as concrete accusations will be inculcated in these broadcasts.

A simulated communist organization using paper and envelopes stamped with the hammer and sickle will send letters to the communists, leading elements in the Army and to persons deemed advisable, to create suspicion , division and doubts. The places in which this fake organization will operate will be designated by RUFUS, as well as the persons to whom it is to be sent. these letters.

The organization that comprises the plan will begin to send letters from Mexico, Central America, South America and the Caribbean to elements of the army, officials of the government and leaders of the revolutionary parties, selecting the persons to whom they should be sent. These letters are of various types, some threatening, others repudiating the communist action of the government, others accusing them for the situation in the country and finally others creating or forming consciousness. They will reveal that in all these countries the true situation that confronts the Republic and the repudation of the regime that governs it is known. On the envelopes of the letters that are deemed advisable, the stamps with the symbols will be pasted, using the reserve in the distinct committees.

The Catholic organizations of Guatemala under the plan of "God Save Guatemala" will request masses in the main churches of the Capital, departmental heads and whereever there are congregations to pray to God to save the nation from the serious ills that Communism has brought, saying prayers, after the masses, prepared by the Catholic priests. The invitations to these masses will be made by means of the press, radio and handbills. They will organize rogations with the same purpose, inviting all by the same means. with the required anticipation, the arrangements should be made in the churches for the development of this plan which covers this stage and the following one.
